INNOVATIVE IMAGING SOLUTIONS

PDF4Books

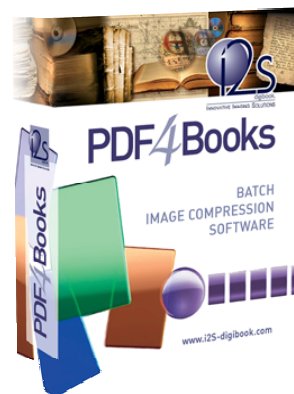

Batch image compression software

▶ Batch compress your scanned documents to PDF® files

PDF4Books is a batch image compression software that significantly reduces the file size of scanned documents (color or grey scale) and converts them into a PDF® file.

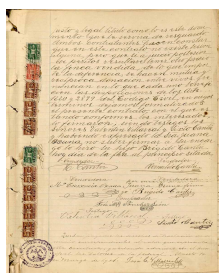

This powerful new image compression technology considerably improves access times to image files and reduces storage spaces. All of which facilitates the distribution of high resolution images on the Internet.

The generated PDF® file is readily viewable on any PC with Adobe® Acrobat®'s free reader and can be text searchable when **PDF4Books** is linked to an OCR engine.

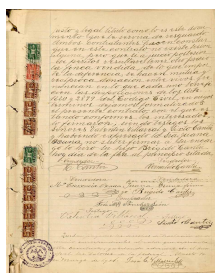

▶ Digitize all your documents in color

Obtain a PDF® file in color at the same size of a standard TIFF G4 file in black and white!

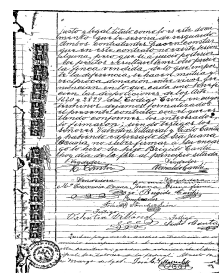

TIFF 10 MB

PDF 82 KB

=

TIFF G4 75 KB

PDF4Books converts your color and greyscale images into small PDF® file sizes of high quality in batch mode.

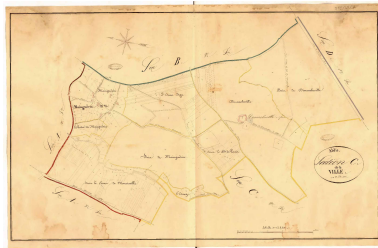

- Original quality is preserved
- Photos and graphics are restored with an optimal quality
- Compression gain from 10 to 20 times better than with standard methods such as JPEG

► For which kind of documents?

• Heritage materials

- Books, manuscripts
- Old maps
- Old press

202 KB instead of 120 MB !

• Corporate documents

- Postal mails
- Forms
- Technical documents
- Press
- Maps

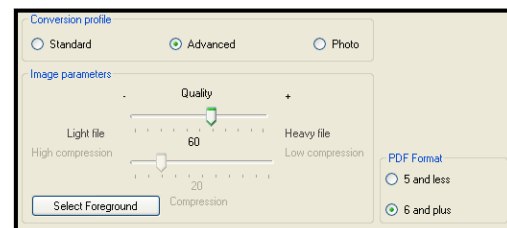

328 KB instead of 17 MB !

► Select your compression rate

To adapt to your document types, you can choose between 3 modes of compression:

- Standard: corporate documents
- Advanced: heritage materials, engravings, manuscript illuminations, lithographies, etc.
- Photo: documents without text

► Create text searchable PDF® files

PDF4Books converts your scanned images to text files if linked to the OCR ABBYY FineReader® 8.0 software.

The searchable PDF® document allows users to search for text in the document.

Input files

- Image format: BMP, TIFF (multipages), JPEG, JPEG2000, PNG, DNG
- Image size: up to 300 MB uncompressed

Output files

- PDF mono or multipages
- PDF Searchable (if linked to OCR engine)

Minimal Configuration

- PENTIUM IV processor
- 1GB RAM
- True colors
- 1280 x 1024 pixels
- Windows XP SP2
- CD-ROM driver
