The essentials of imaging

bizhub C10P

Personal access to instant printing

Office system bizhub C10P

bizhub C10P, office system

Printing with a personal touch

Printing, whether in colour or black and white, should be easy, instantaneous, efficient and reliable. These requirements must not only be met by central departmental output systems – they are equally essential for personal printers and small shared devices.

■ The bizhub C10P is the ideal output device for the every-day office applications of individual users and will equally satisfy the b/w and colour printing needs of small teams. It comes with all capabilities expected of a small networked device that complements the existing larger output systems in the office. But its true domain is that of convenient desktop printer for single workstations, which it provides with instant personal access to b/w and colour prints.

→ Configurations

■ Compact and efficient, the bizhub C10P produces 5 colour or 20 b/w prints per minute. As a real “bizhub” it is easy to operate and integrates seamlessly into the new-generation bizhub product range.

■ Same as the faster multifunctionals the bizhub C10P offers Emperon controller technology and the convenience of various standard PageScope administration tools.

■ And thanks to Simitri toner it delivers a high image quality, no matter whether prints are in colour or black and white.

■ Bringing quality, convenience and efficiency to the office, Konica Minolta’s handy colour printer obviously has a lot going for itself. Buyers’ Lab (BLI), the leading independent authority on office equipment, confirmed this when they honoured the bizhub C10P with one of their coveted “Pick of the Year” awards as “outstanding small workgroup multi-pass colour printer” for 2006.

bizhub C10P 

Smart solution for personal needs

→ Impressive productivity

With its rapid 300 MHz page-processor and standard 128 MB RAM, which is upgradeable to max. 640 MB, the bizhub C10P delivers prints in an instant and completes even longer print runs in next to no time.

→ Powerful Emperon™ controller

Equipped with Konica Minolta's proven Emperon™ controller technology, the bizhub C10P prints from virtually any application. The bizhub C10P is Windows®, Mac® and Linux® compatible and provides versatile printing in any network environment.

→ Optional flexibility

An optional 500-sheet paper tray can upgrade the bizhub C10P's standard paper capacity to a generous 700 sheets. And equipped with the optional duplex unit for automatic double-sided printing, the bizhub C10P helps to save paper for a more environmentally friendly and cost-efficient use!

→ Helpful user accounting

Konica Minolta's user account management enables volume monitoring and control as well as capacity tracking of output devices. A basic accounting functionality is available also on the bizhub C10P, which is especially interesting for installations where this versatile little printer complements other larger bizhub devices.

→ Universal accessibility

The bizhub C10P is easily accessible and integrates seamlessly into any network. Thanks to Ethernet and high-speed USB (2.0) support, connectivity is straightforward and efficient. As an alternative a connection for example to an individual workstation is also possible via a parallel interface.

→ The quality aspect

Utilising 600 x 600 dpi x 4-bit Photo ART™ 9600 contone technology, which equals a resolution of 9,600 dpi, the bizhub C10P produces b/w and colour prints of superior quality for the office. The print quality is further refined through the use of Simitri® polymerised toners and eAIDC (enhanced Automatic Image Density Control). This auto calibration process ensures consistent quality without requiring manual intervention by the user.

→ Practical PageScope utilities

Same as on Konica Minolta's larger multifunctionals, with PS Web Connection makes available web-based device management also for the bizhub C10P. This helpful utility enables all users to monitor individual devices and facilitates the management of the bizhub C10P as part of a pool of bizhub multifunctionals. PS Netcare offers further valuable administrator support, providing fast access and simple monitoring of the bizhub C10P on the network.

The bizhub C10P gives printing the personal touch, providing instant personal access to quality printing in b/w and colour.
